Plant & Shop Equipment

One of the most important considerations in the design and production of plant equipment is the environment in which it will be used and the function it will serve. Products featured in this section are designed to relieve worker stress, to simplify job functions and to make them more efficient.

Schaefer has designed cabinets, trolleys, louvered panel systems, tool storage boxes and a variety of other products that help organize and streamline job functions in industrial installations or workshops. These products complement each other and adapt to changes in the work environment. A lot of thought has gone into the design of Schaefer's shop equipment to make it as job specific, user friendly and flexible as possible.

Equipment designed to improve the modern work-place... all from one source.
